

Clean Set of Claims

Sub E
D1
1. A server adapted to provide broadcast information relevant to a locality to a plurality of localities, said server comprising:

a processor within said server;

a call related information/broadcast information stream relevant to a locality lookup table within said server accessible by said processor and associating call related information entries with respective broadcast information streams relevant to a locality;

a plurality of stored broadcast information streams within said server of current news relevant to a locality;

wherein said processor is adapted to identify a specific one of said plurality of stored broadcast information streams relevant to a locality for downloading a real-time audible representation of said one of said plurality of stored broadcast information streams relevant to a locality to a caller based only on call related information received with respect to an incoming call.

D2
19. A method of selecting a broadcast information stream relevant to a locality, comprising:

receiving call related information relating to a calling party by a server;

determining a desired one of a plurality of broadcast information streams of current news relevant to a locality for downloading to said calling party based only on said call related information by said server; and

downloading a real-time audible representation of said desired one of said plurality of broadcast information streams relevant to a locality to said calling party based only on said call related information by said server.

30: Apparatus for selecting a highly localized broadcast information stream, comprising:

means for receiving call related information relating to a calling party by a server;

means for determining a desired one of a plurality of broadcast information streams for downloading to said calling party based only on said call related information by said server; and

means for downloading said desired one of said plurality of broadcast information streams to said calling party based only on said call related information by said server.
